

Host Bora

Comprehensive QA Test Plan

Manual test checklist for Android and iOS builds.

Document date: 22 July 2026

App: Host Bora (BnB + Rent property management)

How to use this document:

- Mark each checkbox when tested (Pass/Fail in your tracker).
- P1 = must pass before release. P2 = important. P3 = nice to verify.
- Test on both online and offline where noted.
- Test English and Swahili on key flows.
- Record: device model, OS version, app build, server environment (stage/prod).

0. Test Environment & Prerequisites

Before testing, confirm:

- Backend deployed with refresh-token auth and recurring-reminders APIs.
- Test account with at least one BnB property and one Rent property.
- WhatsApp Business credentials configured (if testing messaging).
- Push notifications enabled on device.
- Optional: Tuya smart lock paired for smart-access tests.

[] ENV-01 (P1) - App installs and launches

Steps: Install build from TestFlight/Play Internal. Cold start app.

Expected: Splash/loading resolves; no crash; reaches onboarding or main shell.

[] ENV-02 (P2) - Version check

Steps: Launch app with outdated min-version (if test build available).

Expected: Force-update dialog appears when below min version.

1. Authentication, Session & Security

1.1 Registration & Login

[] AUTH-01 (P1) - New host registration

Steps: Create account with phone, password, name. Complete OTP if prompted.

Expected: Account created; user proceeds to PIN setup or home.

[] AUTH-02 (P1) - Login with phone and password

Steps: Sign in with valid credentials.

Expected: Login succeeds; lands on home or PIN setup if first time.

[] AUTH-03 (P1) - Invalid credentials

Steps: Enter wrong password.

Expected: Clear error message; no crash; can retry.

[] AUTH-04 (P1) - Forgot password flow

Steps: From login, tap forgot password. Request OTP, verify, set new password.

Expected: Password resets; can login with new password.

1.2 Login-once session (refresh token)

[] AUTH-10 (P1) - Stay signed in after closing app

Steps: Login once. Kill app. Reopen within 90 days.

Expected: User enters app without password (PIN/biometric or straight to home).

[] AUTH-11 (P1) - PIN unlock without password

Steps: Set PIN. Background app past app-lock timeout. Unlock with PIN.

Expected: Enters app without password prompt; no login API error toast.

[] AUTH-12 (P1) - Biometric unlock

Steps: Enable Face ID/fingerprint. Lock app. Unlock with biometrics.

Expected: Enters app without password.

[] AUTH-13 (P1) - Silent token refresh

Steps: Stay logged in past 60 min JWT expiry (or simulate). Use any API feature.

Expected: Session renews silently; user not kicked to login.

[] AUTH-14 (P1) - Forgot PIN while session valid

Steps: From Welcome Back, tap Forgot PIN.

Expected: Routes to set new PIN without full password login.

[] AUTH-15 (P1) - Logout clears session

Steps: Settings > Log out. Reopen app.

Expected: Full login required.

1.3 PIN & App lock

[] AUTH-20 (P1) - Create 4-digit PIN

Steps: First login without PIN. Set and confirm PIN.

Expected: PIN saved; Welcome Back not shown immediately after password login.

[] AUTH-21 (P1) - Change PIN

Steps: Settings > Security > Change PIN.

Expected: New PIN works on next lock.

[] AUTH-22 (P1) - PIN lockout

Steps: Enter wrong PIN 5 times.

Expected: Lockout message; retry after cooldown.

[] AUTH-23 (P1) - App lock timeout

Steps: Change timeout in Settings (15s to 30 min). Background and return.

Expected: Welcome Back appears only after selected timeout.

2. Onboarding & First Run

[] ONB-01 (P1) - First-time onboarding slides

Steps: Fresh install. Complete onboarding.

Expected: Onboarding not shown again on next launch.

[] ONB-02 (P1) - Language selection

Steps: Switch app language EN/SW in Settings.

Expected: UI strings update across main tabs.

[] ONB-03 (P2) - In-app review prompt

Steps: Complete 3rd login or use app 7+ days (per rules).

Expected: Two-step review dialog; max 2 prompts, 90 days apart.

3. Navigation & Workspaces

[] NAV-01 (P1) - Bottom navigation tabs

Steps: Tap Home, Properties, Finances, Maintenance, More.

Expected: Each tab loads without error.

[] NAV-02 (P1) - BnB workspace switch

Steps: Switch to BnB workspace from home/header.

Expected: BnB-specific home metrics and actions shown.

[] NAV-03 (P1) - Rent workspace switch

Steps: Switch to Rent workspace.

Expected: Rent hub, tenants, arrears context shown.

[] NAV-04 (P1) - More tab shortcuts

Steps: Open Calendar, Reports, Settings, Help from More.

Expected: Each screen opens correctly.

4. Home Dashboard & Quick Actions

[] HOME-01 (P1) - Home data load

Steps: Open Home tab. Pull to refresh.

Expected: Bookings/revenue cards populate; refresh updates data.

[] HOME-02 (P1) - Quick actions dialog

Steps: Trigger quick actions (FAB or prompt).

Expected: Dialog shows Add Property, Income, Expense, Booking, Tenant, Send Reminder.

[] HOME-03 (P1) - Quick add property wizard

Steps: Quick Actions > Add Property. Complete wizard.

Expected: Property created and visible in Properties tab.

[] HOME-04 (P1) - Quick add income

Steps: Quick Actions > Add Income. Record payment.

Expected: Payment saved; reflects in finances.

[] HOME-05 (P1) - Quick add expense

Steps: Quick Actions > Add Expense.

Expected: Expense saved; reflects in finances.

[] HOME-06 (P2) - AI quick action resolver

Steps: Quick Actions > Other. Type natural language request.

Expected: Correct screen or wizard opens.

[] HOME-07 (P2) - AI Manager FAB

Steps: Tap floating AI button. Ask about income or arrears.

Expected: Response uses portfolio context; no crash offline/online.

5. Properties & Listings

[] PROP-01 (P1) - Add listing wizard

Steps: Properties > + Add listing. Complete all steps with photo.

Expected: Listing saved locally and syncs online.

[] PROP-02 (P1) - Edit listing

Steps: Open listing > Edit. Change name, address, pricing.

Expected: Changes persist after refresh.

[] PROP-03 (P1) - Add/edit units

Steps: Add unit to property. Edit unit details.

Expected: Units appear on listing details.

[] PROP-04 (P1) - Cover photo

Steps: Upload cover photo. Reopen listing.

Expected: User photo displays (not misleading stock if placeholder policy applied).

[] PROP-05 (P1) - Listing details tabs

Steps: Open listing. Switch BnB/Rent tabs, activity, staff panels.

Expected: Data scoped to property; no cross-property bleed.

[] PROP-06 (P2) - Unit occupancy view

Steps: Open unit occupancy from listing.

Expected: Occupancy status accurate.

[] PROP-07 (P1) - Favourites / property list

Steps: Browse My Properties. Search/filter if available.

Expected: All properties listed with correct thumbnails.

6. BnB (Short-Stay) Features

6.1 Bookings

[] BNB-01 (P1) - Create booking

Steps: Add new booking with guest, dates, unit, amount.

Expected: Booking appears on home and All Bookings.

[] BNB-02 (P1) - Booking details

Steps: Open booking. View guest info, payment status, dates.

Expected: Details match created data.

[] BNB-03 (P1) - Check-in / check-out

Steps: Perform check-in and check-out actions.

Expected: Status updates; calendar reflects change.

[] BNB-04 (P1) - Cancel booking

Steps: Cancel an active booking.

Expected: Booking marked cancelled; calendar updated.

[] BNB-05 (P1) - All bookings list

Steps: More > All Bookings. Search/filter.

Expected: List complete; pull-to-refresh works.

6.2 Calendar & Sync

[] BNB-10 (P1) - Host calendar

Steps: Open Host Calendar. Navigate months.

Expected: Check-ins, check-outs, blocked nights visible.

[] BNB-11 (P2) - Calendar sync (iCal)

Steps: Configure calendar subscription import/export.

Expected: Sync settings save; export URL accessible.

6.3 Guests

[] BNB-20 (P1) - Guest history

Steps: Open Guest History.

Expected: Past/upcoming guests with stay and payment info.

[] BNB-21 (P2) - Guest access codes

Steps: Create/share guest access code.

Expected: Code generated and shareable.

[] BNB-22 (P2) - Guest reliability rating

Steps: Rate guest after stay.

Expected: Rating submitted; cooling-off before publish.

7. Rent (Long-Term) Features

7.1 Tenants & Leases

[] RENT-01 (P1) - Add tenant

Steps: Add tenant with lease dates, rent, frequency, currency.

Expected: Tenant linked to unit; appears in Tenancy Insights.

[] RENT-02 (P1) - Edit tenant / lease

Steps: Update rent amount or lease end date.

Expected: Ledger and expected schedule update.

[] RENT-03 (P1) - Tenant ledger

Steps: Open tenant ledger. View payments and balance.

Expected: Running balance correct.

[] RENT-04 (P1) - All tenants list

Steps: Open All Tenants. Filter by property.

Expected: Tenants listed with payment status.

[] RENT-05 (P2) - Lease renewal

Steps: Start lease renewal flow. Share renewed lease.

Expected: Renewal form saves; share action works.

7.2 Payments & Arrears

[] RENT-10 (P1) - Record rent payment

Steps: Record payment from tenant or Quick Add Income.

Expected: Payment in Manage Payments and tenant ledger.

[] RENT-11 (P1) - Manage payments

Steps: Filter by month and property.

Expected: Correct payments listed.

[] RENT-12 (P1) - Expected payment schedule

Steps: Open yearly schedule for property.

Expected: Monthly expected amounts match lease terms.

[] RENT-13 (P1) - Arrears tracking

Steps: Leave tenant unpaid. Check Finances and Rent hub.

Expected: Arrears total increases correctly.

[] RENT-14 (P1) - Multi-currency payment

Steps: Record payment in non-base currency.

Expected: Exchange rate captured; base currency totals correct.

7.3 Tenant charges & contracts

[] RENT-20 (P1) - Define tenant charges

Steps: Add charge types incl. Service Charge.

Expected: Charges apply to tenant billing context.

[] RENT-21 (P1) - Contract hub

Steps: Upload lease PDF. View and share.

Expected: Document stored and retrievable.

8. Recurring Reminders (Rent)

[] REM-01 (P1) - Open recurring reminders

Steps: Quick Actions > Send Reminder OR listing/tenant entry point.

Expected: Recurring reminders screen opens.

[] REM-02 (P1) - Create Pay Rent reminder

Steps: New reminder: Pay Rent, monthly 1st, WhatsApp+SMS, one tenant.

Expected: Reminder saved and listed.

[] REM-03 (P1) - Create Service Charge reminder

Steps: Type Service Charge. Monthly recurrence.

Expected: Reminder created with correct type.

[] REM-04 (P1) - Custom reminder type

Steps: Add custom type name. Save reminder.

Expected: Custom type available for reuse.

[] REM-05 (P1) - Custom recurrence - every N days

Steps: Set custom: every 7 days.

Expected: Preview label and saved rule correct.

[] REM-06 (P1) - Custom recurrence - every N months

Steps: Set custom: every 2 months.

Expected: Rule encoded and displayed correctly.

[] REM-07 (P1) - Custom recurrence - Nth day of month

Steps: Set custom: 15th of each month.

Expected: Next run date logic reasonable.

[] REM-08 (P1) - Bulk by property / all properties

Steps: Create bulk reminder for all tenants in property.

Expected: Multiple recipients configured.

[] REM-09 (P1) - Edit and delete reminder

Steps: Edit channel or recurrence. Delete reminder.

Expected: Changes persist; delete removes from list.

[] REM-10 (P2) - Lease expiry prompt

Steps: Tenant with expired lease.

Expected: Prompt to continue or remove recurring reminders.

[] REM-11 (P1) - Dispatch (backend)

Steps: Wait for scheduled window or trigger test on stage.

Expected: WhatsApp/SMS sent per template; no duplicate spam.

9. Finances, Reports & Analytics

[] FIN-01 (P1) - Financial overview

Steps: Open Finances tab.

Expected: Income vs expense, net income, arrears charts load.

[] FIN-02 (P1) - Record payment (generic)

Steps: Record BnB or Rent payment with method and date.

Expected: Appears in financial totals.

[] FIN-03 (P1) - Add expense

Steps: Add expense tagged to property.

Expected: Expense in Manage Expenses and P&L.

[] FIN-04 (P1) - Manage expenses

Steps: Filter expenses by month/property.

Expected: List accurate.

[] FIN-05 (P2) - Expense analysis

Steps: Open expense analysis charts.

Expected: Categories and trends display.

[] FIN-06 (P1) - Reports hub

Steps: Open Reports. Generate/export report.

Expected: Report data matches app records.

[] FIN-07 (P2) - Monthly P&L summary

Steps: Open monthly P&L for Rent property.

Expected: Income and expenses reconcile.

[] FIN-08 (P2) - ROI / break-even

Steps: Enter ROI estimates. View break-even charts.

Expected: Calculations display; notification on break-even if configured.

[] FIN-09 (P2) - Profit analysis dashboard

Steps: Open profit analysis for listing.

Expected: KPIs match recorded transactions.

[] FIN-10 (P2) - Payment alerts dashboard

Steps: Open payment alerts.

Expected: Overdue/at-risk tenants highlighted.

10. Maintenance

[] MNT-01 (P1) - BnB maintenance tasks

Steps: Maintenance tab > add task. Set date and priority.

Expected: Task listed; appears on calendar.

[] MNT-02 (P1) - Rent scheduled maintenance

Steps: Schedule maintenance from Rent flow.

Expected: Task saves; day-before push reminder fires.

[] MNT-03 (P1) - Edit/complete task

Steps: Mark task complete or edit details.

Expected: Status updates.

[] MNT-04 (P2) - Maintenance cost analysis

Steps: View maintenance spending analysis.

Expected: Totals align with logged expenses.

11. Utilities (LUKU / Smart Utility)

[] UTIL-01 (P1) - Smart utility dashboard

Steps: Open utility dashboard for Rent property.
Expected: LUKU balance and history visible.

[] UTIL-02 (P1) - Per-unit filter

Steps: Select unit chip. Log top-up.
Expected: Stats scoped to unit; top-up tagged correctly.

[] UTIL-03 (P2) - SMS receipt scan

Steps: Scan LUKU SMS receipt.
Expected: Top-up parsed and recorded.

[] UTIL-04 (P2) - Usage graph

Steps: Open utility usage graph.
Expected: Chart renders for selected period.

12. Messaging (SMS & WhatsApp)

[] MSG-01 (P1) - Send SMS

Steps: More > Send SMS. Message one tenant.
Expected: SMS queued/sent via backend.

[] MSG-02 (P1) - Bulk WhatsApp

Steps: Send bulk WhatsApp to multiple tenants.
Expected: Messages sent with rate limiting.

[] MSG-03 (P1) - WhatsApp template builder

Steps: Create/edit WhatsApp template with placeholders.
Expected: Template saves and usable in reminders.

[] MSG-04 (P2) - WhatsApp connection status

Steps: Check WhatsApp status in Send SMS screen.
Expected: Connected/disconnected state accurate.

[] MSG-05 (P2) - Concierge inbox

Steps: Open Rent concierge inbox.
Expected: Messages/threads load.

13. Documents, Vault & Scanner

[] DOC-01 (P1) - Document scanner

Steps: Scan document with camera.
Expected: Preview and save flow works.

[] DOC-02 (P1) - Refine scan

Steps: Crop/adjust scanned image.
Expected: Saved document quality acceptable.

[] DOC-03 (P1) - Property vault

Steps: Upload document to vault. Categorize.
Expected: Document retrievable offline after sync.

[] DOC-04 (P2) - Documents list

Steps: Browse all documents.
Expected: Filter/search works.

14. Smart Access & Security Devices

[] ACC-01 (P2) - Smart access screen

Steps: Open Smart Access from More.
Expected: Devices list or setup prompt shown.

[] ACC-02 (P3) - Entry logs

Steps: View entry logs for connected lock.
Expected: Events listed with timestamps.

[] ACC-03 (P3) - Tuya lock integration

Steps: Pair/control lock if hardware available.
Expected: Lock status updates.

15. AI & Design Tools

[] AI-01 (P2) - AI Manager chat

Steps: Ask portfolio questions online.
Expected: Relevant answers; handles empty portfolio gracefully.

[] AI-02 (P2) - AI offline behavior

Steps: Ask AI Manager while offline.
Expected: Uses local data or clear offline message.

[] AI-03 (P3) - AI pricing optimizer

Steps: Open pricing optimizer for listing.
Expected: Suggestions display without crash.

[] AI-04 (P3) - Price analysis

Steps: Run price analysis.
Expected: Results render.

[] DS-01 (P3) - Interior design studio

Steps: Open design studio. Run generation if available.
Expected: UI functional; errors handled.

[] DS-02 (P3) - Moodboards

Steps: Create moodboard; add images.
Expected: Board saves per property.

16. Staff, Inventory & Loyalty

[] STF-01 (P2) - Staff management

Steps: Add staff member to property.
Expected: Staff appears on listing/team screen.

[] STF-02 (P3) - Staff payroll details

Steps: View payroll reminders/details.
Expected: Data consistent with staff records.

[] INV-01 (P2) - Inventory tracking

Steps: Add inventory item. Record movement.
Expected: Stock levels update.

[] LOY-01 (P3) - Define loyalty offers

Steps: Create loyalty program offer.
Expected: Offer listed in active programs.

[] LOY-02 (P3) - Loyalty thresholds

Steps: Configure thresholds.
Expected: Settings persist.

17. Subscription & Payments (App)

[] SUB-01 (P2) - View subscription status

Steps: Open Subscription screen.

Expected: Current plan/status from server.

[] SUB-02 (P2) - Purchase/renew (iOS)

Steps: Test IAP on iOS sandbox.

Expected: Subscription activates after Apple confirmation.

[] SUB-03 (P3) - Snippe payment link

Steps: Send payment link to tenant if feature enabled.

Expected: Link created; webhook updates status.

18. Admin & Sales Agent (Role-Based)

[] ADM-01 (P2) - Admin WhatsApp credentials

Steps: Login as admin. Open WhatsApp credentials report.

Expected: Admin-only access enforced.

[] ADM-02 (P3) - Sales agents list

Steps: Admin views sales agents.

Expected: List and detail screens work.

[] ADM-03 (P3) - Sales agent dashboard

Steps: Login as sales agent role.

Expected: Dashboard scoped to agent permissions.

19. Settings, Profile & Support

[] SET-01 (P1) - Change base currency

Steps: Settings > Currency. Change TZS/USD etc.

Expected: Dashboard totals convert; originals preserved.

[] SET-02 (P1) - Dark mode

Steps: Toggle theme.

Expected: UI readable in light and dark.

[] SET-03 (P2) - Notifications preferences

Steps: Toggle notification settings.

Expected: Preferences persist.

[] SET-04 (P2) - Clear offline data

Steps: Settings > Clear offline data (test account only).

Expected: Local DB cleared; re-sync from server.

[] SET-05 (P1) - Help center

Steps: Open Help Center. Open a guide. Deep link to feature.

Expected: Guides open; navigation works.

[] SET-06 (P2) - Support & feedback

Steps: Submit support message and feedback.

Expected: Submission succeeds or shows error.

[] SET-07 (P3) - Terms & privacy

Steps: Open Terms and Privacy screens.

Expected: Content loads.

[] SET-08 (P3) - About / app version

Steps: Open About.

Expected: Version matches build.

20. Offline Mode & Sync

[] SYNC-01 (P1) - Offline property view

Steps: Load properties online. Go offline. Browse listings.
Expected: Cached data visible.

[] SYNC-02 (P1) - Offline create

Steps: Create expense or payment offline.
Expected: Queued locally; syncs when online.

[] SYNC-03 (P1) - Sync after reconnect

Steps: Perform offline writes. Restore network.
Expected: Queue drains; no duplicate records.

[] SYNC-04 (P3) - Conflict handling

Steps: Edit same record on two devices (if testable).
Expected: Predictable resolution or last-write wins documented.

21. Notifications & Background

[] NOT-01 (P2) - Push notification receive

Steps: Trigger maintenance/reminder notification.
Expected: Notification received on device.

[] NOT-02 (P2) - Notification tap deep link

Steps: Tap notification.
Expected: Opens relevant in-app screen.

[] NOT-03 (P2) - In-app notifications list

Steps: Open Notifications screen.
Expected: List loads and marks read.

22. Platform-Specific (iOS & Android)

[] PLAT-01 (P1) - iOS Face ID

Steps: Full auth + app lock flow on iPhone.
Expected: Face ID works; no Keychain errors.

[] PLAT-02 (P1) - Android fingerprint

Steps: Full auth + app lock on Android.
Expected: Biometric prompt works.

[] PLAT-03 (P1) - Camera & gallery permissions

Steps: Add listing photo, scan document.
Expected: Permission prompts and fallbacks correct.

[] PLAT-04 (P1) - Share sheet

Steps: Share report/lease via WhatsApp.
Expected: OS share sheet opens with content.

[] PLAT-05 (P1) - Background/foreground

Steps: Background app 5+ min. Return.
Expected: App lock or resume without crash.

Appendix A. Bug Report Template

For each failure, record:

1. Test ID (e.g. AUTH-11)
2. Build number & environment (stage/prod)
3. Device & OS
4. Steps to reproduce
5. Expected vs actual
6. Screenshot or screen recording
7. Severity: Blocker / Major / Minor / Trivial

Appendix B. Suggested Test Order

Day 1: Sections 0-2 (Auth, onboarding)

Day 2: Sections 3-7 (Core BnB + Rent flows)

Day 3: Sections 8-12 (Reminders, finances, messaging)

Day 4: Sections 13-20 (Documents, AI, settings, offline)

Day 5: Sections 21-22 + regression on P1 failures
